

SEB and Briox launch joint accounting solution for small-medium businesses

SEB in collaboration with accounting software provider Briox are launching a new accounting solution that enables small and medium sized businesses to work more efficiently.

Briox's accounting and invoicing modules including reports are now available to corporate customers via SEB's corporate client internet bank. Briox accounting system is available from SEB's internetbank and can be accessed via Additional services / Settings -> E-Services.

The service helps companies to get a clear overview of their financial position and makes accounting easier for small and medium-sized businesses. As a single point of contact for companies, SEB ensures that banking transactions are automatically processed through the Baltic Gateway and all accounting is managed through Briox. In this way, entrepreneurs can use Briox to get a complete overview of their financial, accounting and billing status.

Through the cooperation, SEB and Briox will be complementing each other's services, while growing Briox's potential customer base and Estonian brand. Businesses will continue to enjoy a smooth accounting experience when bookkeeping via Briox.
